Angular HTML CSS

Javascript

Node Laravel Ionic Mysql

MongoDB Postman Swagger

Figma Git, Github, Gitlab

Visual Studio Code

CERTIFICATES

Codecademy

Learn HTML, CSS, Javascript, React.

MongoDB University

M001 MongoDB Basics

PROJECTS

Mahindra Summit (admin panel)

📅 10/2023 - 12/2023

📍 active neurons technology

Software Developer

- As a software developer, I build a project structure with environments, assets, core, interceptor, shared, service. Mahindra summit is like an admin panel that allows admin to manage farmer information and credentials. I created a chart using apex charts, reactive forms, loader service, toaster notifications service, CSP (content security policy).
- Tools Used :CoreUI, Angular, Swagger, Postman, Vscod, Gitlab, TortoiseGit.

Fishtokri Website (e-commerce service)

📅 08/2023 - 10/2023

📍 active neurons technology

Software Developer

- As a software developer, I created a login page, checkout page, user panel, contact us page. Fishtotri website is like an e-commerce service that allows users to order non veg food. I did api integration of the login page, checkout page, user panel, contact us page and also added loader, toaster notification service, CSP (content security policy).
- Tools Used : Angular, Swagger, Postman, Vscod, Gitlab, TortoiseGit.

SUMMARY

CURRENTLY WORKING ON ANGULAR PROJECTS WITH ASP DOT NET BACKEND. ALSO COMPLETED A NODE JS AND IONIC PROJECTS WITH MONGODB AND MY SQL DATABASE AND ALSO USED REACT FOR PERSONAL PROJECT.

PROJECTS

Ripple Hire (admin panel)

📅 06/2023 - 08/2023

📍 active neurons technology

Angular Developer

- As an angular developer, updated a dynamic forms in rh and custom modules, also create custom component. create dynamic forms with API's validation, dropdowns, search input, pagination, and tables.
- Tools Used : Angular Material, Swagger, Postman, VScode, Gitlab, TortoiseGit

SD (Sales Dashboard)

📅 12/2022 - 05/2023

📍 Horizon Financial & Properties Advisers LLP

Full Stack Developer

- As a full stack developer, created incentive details module in incentive details module, i make eight reports (User Monthly Incentive, User Quarterly Incentive, User Half Year Incentive, User Yearly Incentive, TL Monthly Incentive, TL Quarterly Incentive, TL Half Year Incentive, TL Yearly Incentive) to get each User and TL Incentive with its time period. Create eight services that automatically run when next month, quarter, half year, year comes. Add incentive calculation functionality and created tables in mysql database for each incentive report. created frontend part with dropdowns, search input, pagination and created tables with each incentive table requirement.
- I created consultancy report to get consultancy fees for each deal that was done by the user, also write some backend queries in mysql database, use storage procedures and triggers in mysql database.

Autodeal Dashboard

📅 10/2022 - 11/2022

📍 Onelife Capital Advisors LTD

MEAN Stack Developer

- As an MEAN Stack developer, I build a car's GET and POST APIs to get car collection data. Add admin login system. Add core ui charts to represent cars collection data in charts format. Add an angular material table for representing cars collection data and also update cars collection data using GET and POST APIs.
- Tools Used : Angular, Angular Material, Nodejs, Express, MongoDB, Postman, VScode, Gitlab.

Autodeal Website (Car buying website)

📅 05/2022 - 12/2022

📍 Onelife Capital Advisors
